Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,4-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over the British '825 (British) publication in view of the French '210 patent (French). British discloses the basic gyratory crusher including a motor connected to a drive shaft below a crushing head. There is no shaft surrounding the drive shaft which could produce numerous problems such as contamination and increased necessary maintenance. French solves this problem by showing similar apparatus including a drive shaft located within a main shaft. In order to prevent obvious maintenance problems, it would have been obvious for one of ordinary skill in the art to modify British by providing a main shaft to surround the drive shaft, taught to be desirable by French. The remaining limitations not shown in the references are typical feature so gyratory crushers well known in the art. For example, the use of mobile oriented crushers is well known in the art and of no patentable merit.
